Experience

Front End Developer, Kyros Technologies, Chennai.

July 2022-Aug 2023

- Developed a responsive web Application that is optimized for both desktop and mobile devices, increasing user engagement .
- Used React Js library to create a dynamic, interactive user interface that improved user experience
- Integrated APIs to provide additional functionality and improve user experience
- Utilized version control systems such as Git to manage code changes and collaborate with other developers
- Developed a custom theme for a Customer Relationship management system (CRM) that improved the look and feel of the website.
- Used AXIOS to create a seamless data exchange between the front-end and back-end.

Technical Skills

Version Control:- Github

Skills : REACT JS,JAVASCRIPT,HTML,CSS.

Tools/Utilities : VS CODE.

Front End Knowledge :

- **React Js:-** Component,state,props,and the virtual DOM,Component Lifecycle,React Hooks,Redux, API Data Fetching,Routing,State Management and Function.
- **JavaScript:** Proficiency in JavaScript including ES6+ syntax, DOM manipulation, event handling, and asynchronous programming with promises and async/await. Understanding of closures, scope, and the prototype chain is important.
- **HTML/CSS:** Strong understanding of HTML5 and CSS3 including layout techniques (flexbox, grid), responsive design principles, and CSS preprocessors like Sass or Less.

- **Bootstrap:** Bootstrap is one of the most widely used CSS frameworks. It provides pre-built components and responsive layout utilities, making it easy to create clean and consistent designs.
- **Front-end Libraries:** Experience with popular front-end libraries like React.js Knowledge of component-based architecture and state management concepts.
- **Version Control:** Familiarity with version control systems like Git and understanding of basic Git workflows (e.g., branching, merging, pull requests).
- **Responsive Web Design:** Ability to create websites that work well across various devices and screen sizes using media queries, fluid layouts, and responsive images.
- **Package Managers:** Experience with package managers like npm or Yarn for managing project dependencies and scripts.
- **HTTP API :** Understanding of HTTP protocol requests, and familiarity with RESTful APIs In React.
- **UI/UX Principles:** Understanding of user interface (UI) and user experience (UX) design principles, and ability to collaborate effectively with designers.
